

# Number Triangle

Can you put one of the numbers from 1 to 9 in each of the circles along the edge of the triangle above such that when you add the four numbers along each side you will get the same total? You also have to get the largest possible total for each side...

What is the same biggest total number you can find that all four numbers along each side of the triangle add up to? You can only use each of the numbers from 1 to 9 one time only.
